

Journal 1 – Earth Systems

Copy the following picture in your journal. Make sure you label each sphere

Copy the following explanations/examples of each sphere.

Geosphere/lithosphere – contains all of the hard, solid rock of the planet's crust (surface), the semi-solid rock that lies underneath the crust, and the hot liquid rock near the center of the planet, and the solid iron core (center) of the planet.

****Example: all land on Earth

Hydrosphere – contains all of the planets solid, liquid, and gaseous water.

****Example: oceans, rain etc...

Biosphere – contains all living organisms

****Example: all plants, animals and humans.

Atmosphere – contains all of the planets air.

****Example: the air we breathe.
