## Graphing Practices

Independent Variable: An independent variable is exactly what it sounds like. It is a variable that stands alone and isn't changed by the other variables you are trying to measure.

The Independent Variable is located on the " $x$ " or horizontal axis.
In most charts or tables the Independent Variable is the left column.
Dependent Variable: A dependent variable is what you measure in the experiment and what is affected during the experiment. The dependent variable responds to the independent variable. It is called dependent because it "depends" on the independent variable

The Dependent Variable is located on the "y" or vertical axis.
In most charts or tables the Dependent Variable(s) is the left column.
DV

IV

| IV "x" axis | DV " $y$ " axis |
| :--- | :--- |
| Number <br> of People <br> for Dinner | Time to <br> Prepare <br> Dinner <br> (hours) |
| 3 | 0.5 |
| 4 | 0.75 |
| 5 | 1.25 |
| 6 | 1.5 |
| 7 | 1.65 |
| 8 | 1.75 |

Graph the Dinner data. Include a title, independent variable, dependent variable, and use a proper interval.

Title $\qquad$

x

Graph the Temperature data as a double line graph. Include a title, independent variable, dependent variable, and use a proper interval.

| Day | Weekly Temperature |  |
| :---: | :---: | :---: |
|  | High | Low |
| Sunday | 72 | 54 |
| Monday | 74 | 53 |
| Tuesday | 69 | 51 |
| Wednesday | 65 | 57 |
| Thursday | 64 | 59 |
| Friday | 66 | 59 |
| Saturday | 68 | 60 |

Graph the data as a bar graph. Include a title, independent variable, dependent variable, and use a proper interval.

| Favorite Desserts |  |
| :---: | :---: |
| Type | Number |
| Ice Cream | 75 |
| Cake | 63 |
| Pie | 42 |
| Cookies | 17 |
